PROFESSIONAL SUMMARY

Full-stack engineer and founding team member at a product-stage fitness-tech startup, **leading end-to-end development of SocioFitt**, a deployed social fitness platform. Experienced across backend, frontend, databases, and cloud, with a focus on building scalable systems in fast-paced environments.

TECHNICAL SKILLS

Languages: Python (Primary) · Java · JavaScript (ES6+) · SQL

Frameworks & Libraries: Django REST Framework · React.js · Next.js · Celery · REST APIs · JWT Auth

Databases & Storage: PostgreSQL · MySQL · SQLite · Redis · Database Schema Design · Query Optimisation

Systems & CS Fundamentals: Operating Systems · Computer Networks · DBMS · OOP · System Design · Computer Architecture

DevOps & Tooling: Git · GitHub · GitLab · CI/CD Pipelines · Linux · Postman · VS Code · Agile / Scrum / Kanban

AI & Emerging Tech: Prompt Engineering · LLM API Integration · AI-driven Feature Development

Soft Skills: Technical Leadership · System Architecture · Cross-functional Collaboration · Problem Solving · First-Principles Thinking

PROFESSIONAL EXPERIENCE

Director of Software Engineering — Founding Team Member | *FluentX (RRFX Infotech Pvt Ltd)* Mar 2025 – Present
loc Chennai, Tamil Nadu · Full-time

- Part of the **core founding development team**; worked closely with the founders and business stakeholders to understand product vision and translate it into working software from day one.
- Architected and built **SocioFitt** end-to-end — a social fitness platform covering user social feeds, AI-personalized workout plans, trainer booking, studio discovery, group challenges, meal planning, and a trainer CRM dashboard.
- Designed the full system architecture from the ground up: database schema, API structure, authentication flows, background jobs, and cloud deployment — all built with scalability in mind.
- Built **200+ REST API endpoints** using Django REST Framework; implemented JWT auth, request validation, rate limiting, and proper error handling across all endpoints.
- Developed the frontend in **React.js and Next.js** with server-side rendering for SEO and a fully responsive UI/UX for mobile and web.
- Set up and managed **AWS deployment** (EC2, S3, RDS); configured CI/CD pipelines and environment management to support stable production releases.
- **Led a cross-functional team of 10+** engineers covering frontend, backend, and ML — handled task delegation, code reviews, sprint planning, and delivery.
- Integrated **LLM APIs with custom prompt engineering** to power personalised workout and meal plan generation based on user fitness goals.

PROJECTS

SocioFitt — Social Fitness Platform

Python, Django REST Framework, React.js, Next.js, PostgreSQL, Redis, Celery, AWS, LLM APIs

- Engineered a scalable backend using **Django REST Framework** with **200+ RESTful APIs**, supporting concurrent user workflows across social feeds, bookings, and recommendations.
- Designed and optimized **PostgreSQL schemas** and complex queries; leveraged **Redis caching** and **Celery-based async workers** to reduce API latency and handle background jobs efficiently.
- Implemented JWT-based authentication, rate limiting, and robust validation layers, ensuring secure and fault-tolerant API communication.

- Built SEO-optimized frontend using **Next.js (SSR)** and **React.js**, improving load performance and discoverability.
- Deployed and managed production infrastructure on **AWS (EC2, S3, RDS)** with CI/CD pipelines, enabling reliable and repeatable releases.

2nd Project — Social Fitness Platform

Python, Django REST Framework, React.js, Next.js, PostgreSQL, Redis, Celery, AWS, LLM APIs

- Lorem ipsum dolor sit amet, consectetur adipiscing elit. Brief one-liner about what the project does and the problem it solves.
- Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Key technical decision or notable implementation detail.
- Ut enim ad minim veniam, quis nostrud exercitation. Outcome, metric, or impact if available.

3rd Project — Social Fitness Platform

Python, Django REST Framework, React.js, Next.js, PostgreSQL, Redis, Celery, AWS, LLM APIs

- Lorem ipsum dolor sit amet, consectetur adipiscing elit. Brief one-liner about what the project does and the problem it solves.
- Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Key technical decision or notable implementation detail.
- Ut enim ad minim veniam, quis nostrud exercitation. Outcome, metric, or impact if available.

EDUCATION

Bachelor of Engineering — Mechanical Engineering

Aug 2021 – Mar 2025

SRM Easwari Engineering College, Chennai

CGPA: 8.51

Developed strong analytical thinking and systems-level problem-solving through a Mechanical Engineering background, which I actively apply to software architecture and scalable system design. Transitioned into software development by independently building expertise in core computer science fundamentals and full-stack technologies during and after my academic tenure.

HSE (Class XII)

Mar 2021

Lord Venkateshwara Mat. Hr. Sec. School, Madurai

88.7%

PERSONAL

Languages: Tamil (Native), English (Professional)

Sports: Volleyball, Football, Swimming, Handball

Active athlete — competing and playing all four sports. Strong team-player instincts shaped both on the field and at work.
